

AI-Powered HMS Synthetic Clinical Dataset

Imaging Report

Patient Name	Dinh Thi Linh	MRN	MRN-0070
DOB	1963-11-02	Gender	Female
Encounter Date	2026-04-05	Department	Cardiology
Attending Provider	RN Jamie Owens	Status	active

Synthetic Data Warning: This document is generated for software testing, OCR parsing, chunking, embedding, access-control validation, and Graph RAG demonstrations. It is not valid medical advice and must not be used for patient care.

Imaging Modality

Chest X-ray

Clinical Indication

Evaluation of dyspnea on exertion and lower-extremity edema with department-specific concern in Cardiology.

Findings

Mild cardiomegaly with small bibasilar atelectatic change. No focal lobar consolidation, pleural effusion, or pneumothorax.

Impression

No immediately life-threatening imaging finding is identified in this synthetic report. Correlate with clinical presentation and lab trend.

Structured Imaging Extraction Hints

Relevant Entities

Patient: Dinh Thi Linh; MRN: MRN-0070; modality: Chest X-ray; diagnosis context: acute on chronic heart failure with preserved ejection fraction, atrial fibrillation, hypertension.

Follow-up Recommendation

Review imaging in clinical context. Escalate if imaging findings conflict with worsening symptoms, unstable vitals, or abnormal neurologic status.
